RILEY H. ALLEN

THE NEW SHIP REGISTRY BILL

Under the broad terms of the bill passing through Congress to put foreign ships under American registry, any foreign-built ship may come under the American flag provided it is American-owned.

The house bill indorsed by the senate yesterhad discussed the situation. It is known as the Underwood Merchant Marine Relief bill and is as follows:

"Be it enacted by the Senate and House of Representatives of the Uinted States of America in Congress assembled, that the words 'not more than five years old at the time they apply for registry' in section 5 of the act entitled 'An Act to provide for the opening, maintenance, protection and operation of the Panama canal; and the sanitation and government of the Canal Zone,' are hereby repealed.

"Sec. 2. That the President of the United States is hereby authorized, whenever in his discretion the needs of foreign commerce may require, to suspend by order, so far as he may deem desirable, the provisions of the law prescribing that all the watch officers of vessels of the United States registered for foreign trade shall be citizens of the United

"Under like conditions, in like manner and to like extent, the President of the United States is also hereby authorized to suspend the provisions of law requiring survey, inspection and measurement by officers of the United States of foreign built vessels admitted to American register under this act. "Sec. 3. This act shall take effect immediately."

According to recent despatches, the movement o restrict the scope of the bill has not succeeded. All restrictions on registry are removed except that which provides that ships thus admitted must be owned by American citizens or Amerian corporations.

Change of registry, it should be noticed, must accompanied by an actual change of hands nd bona fide sale. Unless there is a bona fide hange in ownership, international law would ot observe the neutrality and immunity from eizure of any vessel that ran to the masthead he American flag merely to save her from moestation by a hostile warship.

N ARGUMENT FALSIFIED

Piling up armament bills in staggering quanities, ministers and cabinets of Europe have put orward the invariable cry, "Military preparedess is the best guarantee against war!"

With this to placate the people who paid the ills, France, Germany, Russia, England and outed the archpriests of militarism.

een this war coming for four decades and are political expediency. eady for it!" And because the European owers had been trebling armies and quadruing navies, they were ready at once to take e field against each other. Their military precentive to war.

And the time-honored argument of the aposles of militarism crumbled-crumbled at the irst under-growlings of European conflict.

What a travesty on statesmanship this policy f European militarism is now revealed!

WAR AND AMERICAN TRADE

Among the really tremendous opportunities ffered by the European war for the United ing. tates to build up commercial relations with her countries is that of South American finan-

al development. European bankers have succeeded in getting strong grip on South American finances beuse European banking-houses have been more ady to buy South American bonds than have emerican institutions. But the war will put n end to European purchases of foreign bonds nd at the same time will induce many of the ritish and Continental banking-houses to get d of what bonds they hold for the sake of

Although American trade is well established Argentina, Brazil, Chile, and Peru and is rowing despite the lack of direct banking facities, steamship accommodations, etc., Amerian banks are imperatively needed in South merica as a dependable resource in the camaign for greater trade. This is the conclusion days. EDITOR

facturers' Association, who has submitted to factures to letters if the made and drew the inference which the Department of Commerce a report on bank writers so desire, but cannot give ing and credit in South America, based upon a space for anonymous communicacareful investigation of that field. Mr. Hurley tions.) was assigned to this special task by Secretary Redfield, who is making a strenuous effort to increase the sale of American products in South America and was instrumental in securing an appropriation from Congress for this particular purpose.

Foreign and native banking houses reason- to a statement in an editorial reflecday was drafted in the White House after the ably well accommodate the ordinary routine of president and Democratic Leader Underwood American trade, Mr. Hurley states, but they naturally withhold the full measure of interest and solicitous support accorded to enterprises of their own nationality. Moreover, many valuable collateral benefits arising from the financing of over-sea trade are lost through American reliance upon London banking mediation, while Mr. Withington is as follows: the compulsory use of European materials in many South American enterprises financed in Europe is steadily restricting the potential market for American goods. American salesmen misrepresentation and abuse, but it clusion for Hawaii. and trading houses also lack the support given does give me pain to see a newspaper | Are we going to acknowledge that

As South American countries are being developed largely with funds from European countries, information as to the character and of July I was in Washington six times, standing of persons back of the various enter. and from the 19th of June wes almost prises is the first need of those whom they approach abroad; hence foreign banks have be and found Mr. Desha attentive to his come channels through which investments are made in railways, light and power companies, McClellan secretary to the delegate, little difficulty in understanding that etc. Without the detailed information that the foreign banks possess or can obtain of these numerous projects, the development of South America would not proceed so rapidly.

> Foreign investments in South America may the force in the adjoining office who be put off on the year that it should be divided into loans to governments and loans ception of the occasions when the go down to the wharf and jump off for industrial purposes. South American gov- secretary, in the course of his business, the end and say, "here goes nothing." ernment bonds are largely held in Europe and was visiting the departments or waitthe fiscal policy of these countries is materially affected by the attitude of European bankers. Government ownership of utilities is extensive and loans for municipal improvements are numerous. This not only assures the European investor his interest but also extends the market for imported materials. In recent years the practice of stipulating the use of materials from countries loaning the money for railways, port works, etc., has increased, and this operates to restrict the field for American manufacturers, since American capital does not largely enter the South American field.
